

MATAMOROS "IMAGINARIOS"

July 12th, 2010

PRESS RELEASE

New release on NeovinyL's netlabel division. After all the flurry of festivals, clubs and mega hits that summer brings, we take a break and we leave Mauricio Matamoros write a new page on our netlabel with a particular sensitivity. With this work we are continuing our commitment to more personal with an EP called "Imaginarios."

This charismatic Chilean producer that started in electronics back in 2002 with a distinctive and evocative album "Artificial". Was gradually embedded in the netlabel scene and it was not until 2008 when he released his first EP at the prestigious Chilean netlabel "Epa Sounds." Since then we can enjoy his work on labels like Impar, Pueblo Nuevo and Epa Sonidos, that bode well for an excellent career in the Creative Commons world.

The style of this EP could be defined as microhouse with experimental touches combined with some techno and glitch.

To close the EP we have had a remix of Chilean also Danieto that after his last release on Level Records leaves a great remix on the track "Imaginarios".
